Zenkill III

Long Shot ZENEX NUMBER 495975

DESCRIPTION

Long-range, fast-acting Wasp and Hornet Killer with synthetic pyrethroid formula that literally stops wasp, hornets, yellow jackets, and bees in flight on contact.

FEATURES AND BENEFITS

Special blast valve sends a powerful, anti-drift stream twenty feet or more to quickly and safely saturate nests and swarms. Residual action continues to kill as insects return to nests. Non-conductive formula has a dielectric strength of 41,000 volts/cm.

APPLICATIONS AND USES

Intended for outdoor use to destroy nests in telephone poles, trees, bushes, chimneys, cracks, crevices, attics, warehouses, and other areas where food items are not exposed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. May cause staining (darkening) of asphalt surfaces and shingles. (Remove protective cap.) Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will keep wasps and hornets returning to the nests. Wait at least 24 hours before removing the nest. To kill wasp, hornets, and yellow jackets, and bees under eaves, screens, window frames, doors, patios, cracks, holes or crevices, wherever insects are noticed, spray for about 1 - 2 seconds or until surfaces are moist. To prevent entrance of insects in to the house, spray around points where insects enter such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges. Do not apply to pets or contaminate feed, foodstuffs, dishes, or utensils. Avoid spraying vegetation directly.

SIZE / AVAILABILITY

20 oz. Aerosol
Net Weight 13 oz.
